

Application Scoring Sheet: **RAIN BARREL**

MINIMUM REQUIREMENTS TO GET BASE FUNDING

If all requirements are met, project automatically receives **75% funding up to \$100 per rain barrel**. Grant coordinator has discretion to allow more than one barrel per residence depending upon water usage plan, runoff area size, or other relevant factor.

- Basic application materials provided:**
 - Before photos of project area(s)
 - Diagram showing where rain barrel will be installed on the property
 - Detailed cost estimate including list and description of materials including rain barrel (capacity, etc.) and any other supplies needed to connect rain barrel to downspout.

- Application form includes information on how rain barrel will be installed and details how water from rain barrel will be used.** Note: It's not recommended to water edible vegetables/fruit with stormwater runoff.

- If installation site is part of a multi-family residence,** applicant has the legal right to install a rain barrel or has permission from the homeowners association and/or property manager, whichever is appropriate.

ADDITIONAL FUNDING & COMMITTEE RECOMMENDATION

For each item checked below, the project will receive additional percentage funding as shown. **The maximum cost share for any project is 75%.**

Base funding if MINIMUM requirements met:	75%
Additional funding criteria:	
<input type="checkbox"/> Installation site is located within an environmental justice area of concern ⇒ Add 25%	
FUNDING RECOMMENDATION	
Number of Rain Barrels approved (the grant coordinator has discretion to approve more than one rain barrel if size of roof or amount of captured volume of runoff is significant)
